

Build back better by design

- *Minimise trauma, disruption and relief and recovery costs to community, industry and national economy*
- *Improve 'insurability' of our region, residents and business - data, where, what and how we build*
- *Climate-proof critical infrastructure that underpins operation of Greater Shepparton - Australia's food, fibre and freight hub.*

Road network

- Second river crossing for freight, workforce and community (Goulburn Valley Bypass stage 1)

Energy generation, storage and supply

- Renewables pathway to regional energy security
- Mitigate reliance on 'thin' distribution network

Housing

- Co-invest to (retro)fit proven smart design into rebuild
- Funding to develop community-lead Greater Shepparton Future Housing Prospectus
- Incentives to encourage redevelopment of Greater Shepparton's CBD - building-up competitive with building-out.

Workforce availability

Increase local workforce

- Clinical health school
- Regional centres of excellence - climate adaptation (health, agriculture & supply chains)
